## International Motor Controls, Inc.

### Manufactures:

- MCC's (up to 5000 A)
- UL 891 Switchboards
- Custom Control Panels
- Pump Panels

### Along with:

- Designing
- Building
- Testing
- On-site Start-up
- Consulting

### For industries such as:

- Power Generation
- Pump Manufacturers
- Water/Waste Water
- OEM's

## Renewable energy

*Flexible, Safe & Innovative  
Motor Control Solutions*

**International Motor Controls, Inc.** is a company, with an experienced staff of more than 60 years in the industry, providing motor control solutions for industry, municipalities, OEM's and end users.

This staff assembles starters, custom control panels, dead front switch-gear and motor control centers with the thorough understanding of industrial controls, the integration of their components, sensors, transmitters and operating software.

**International Motor Controls, Inc.** specializes in packaged waste treatment systems, pumping stations, technology equipment, lift stations, and other industrial control panel applications according to UL, NEMA, CSA, IEC and CE; as well as motor control centers according to UL, CSA and IEC.

**International Motor Controls, Inc.** also provides custom design and engineering for any project, large or small. International Motor Controls, Inc. has the knowledge and capabilities to engineer efficient and cost-effective custom systems to meet your requirements.

**International Motor Controls, Inc. is:**

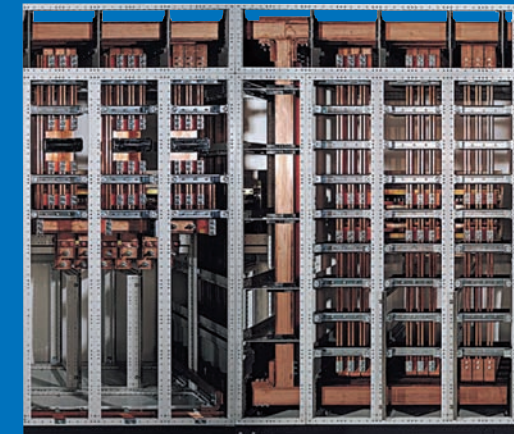

- a UL 508A, UL 845 and UL 891 panel shop using only UL-listed and state-of-the-art components
- a solution provider who utilizes state-of-the-art modular technology for motor control centers
- a partner with other industry leaders
- a client-oriented company where service is the number one priority; large enough to design, build, and deliver sophisticated control systems, yet small enough to maintain that personal touch

- dedicated, experienced engineers and technicians available for field service support (such as start-up and commissioning), installation supervision, operator training, monthly service contracts, and emergency service calls

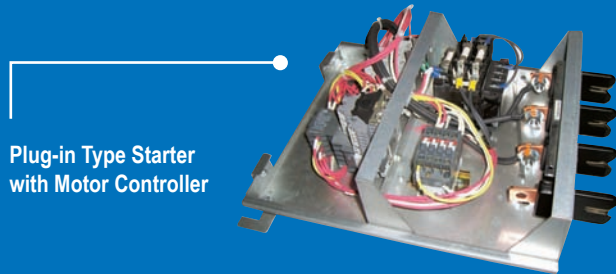

**Sincerely,**  
**Dietmar Mertel, President and CEO**  
**International Motor Controls, Inc.**

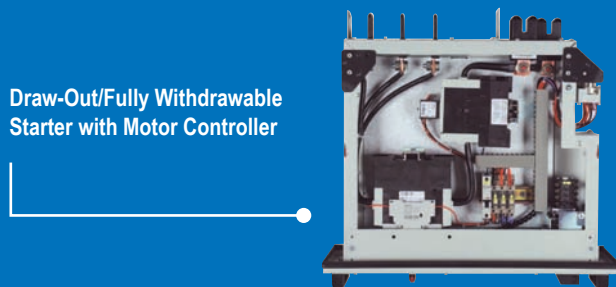

MCC for an Off-Shore Application Center  
 Sections with four (4) integrated lights on top  
 (standard) Starters, Distribution, and Metering
